

+ BEEF MIDDLE PIECES

Naturalcasings

Casings for the elaboration of sausages obtained from a portion of the bovine large intestine, the colon, processed through rigorous manual procedures.

Basic Ingredient

Bovine large intestine (colon).

Preservative

Food grade sodium chloride, saturation at room temperature. Brine.

Presentation

Strips of different lengths, in nets containing 100 pieces.

Calibers

45 to 80mm range.

Unit weight

The weight of the skein is variable and is not an attribute considered for the commercialization.

Water Activity

AW= 0,75±0,3

Preservative Density

23±2 Baumé.

Product use

Ready to use casings for the sausage industry.

Expiration date

24 months from manufacturing date.

Primary packaging

Low density polyethylene bag.

Secondary packaging

Tight-fitting lids reinforced plastic barrels.

Conservation & Storage

Cool & dry environment (min. 1°C - max. 30°C).
