+ BEEF SWEETBREAD

It is constituted by the thymus, a gland integrated by a cervical and a thoracic portion, which is located on both sides of the trachea, lobed and pale yellowish in color. This gland has its greatest development in the calves, atrophying in adult animals. It is conditioned with its surface completely fat free.

Weight

Gross weight: 10.5kg. Net weight: 10kg.

Labeling

Self-adhesive label on the box front.
